ROCHESTER

Many special advantages are offered by Rochester to the homeseeker and to the business man. It is a city with picturesque surroundings, set in the heart of the fertile Genesee Valley at the point where the river takes a drop of more than 300 feet in a series of three falls, and thus presents an ideal combination of industry and agriculture. The city occupies a strategic position from the standpoint of transportation, so that raw materials are easily and cheaply obtained and finished products promptly distributed. The city owes its location to the power generated in the Genesee River. The development of this power, originally used to cut logs and grind corn, has made Rochester an industrial city of note whose products are known in all parts of the world.

In its growth the city has lost few of its original charms and has taken on all the advantages of a large city. Rochester is located in the largest agricultural county in New York State, a county which ranks well up in point of productiveness with any in the country. Monroe County, with its five surrounding counties, total a population of about 500,000, and a circle drawn with a radius of 90 miles from Rochester embraces a population of nearly two million.

Known first as the Flour City because of its extensive milling interests, the city's cognomen was later changed to the Flower City because of the extensive horticultural interests which were developed. With the growth of industry on a large scale, the city became known as the city of varied industries and took as its slogan "Rochester Made Means Quality." Rochester boasts many famous industrial organizations and leads the world in the production of a number of products.

In Rochester are the largest manufacturers of enameled steel tanks in the world; the largest manufacturers of filing devices and office systems; the largest thermometer plant in the world; the largest optical works in the world; the largest manufacturers of check protectors; the largest film factory in the world; the largest camera factory in the world; the largest photographic plate factory in the world; the largest manufacturers of soda fountain fruits and syrups. It is a leader in telephone apparatus, paper box manufacture and many other lines. More high-class ivory buttons are made here than in any city in the United States. It is the headquarters of the nursery business of the United States.

The city boasts 1700 manufacturing establishments producing over 325 separate commodities. The investment in manufacturers is \$200,000,000 and the annual wages paid approximate \$110,000,000. Rochester is the world's headquarters for photographic goods and supplies. It ranks fourth in the production of women's shoes and has the same rank in the production of men's clothing. The production of shoes each year is valued at \$40,000,000 and the clothing output is valued at \$80,000,000.

The city covers 21,009.5 acres. Its assessed valuation is \$471,478,774. The death rate in 1924 was 10.56 per thousand population. The birth rate in 1924 was 20.01 per thousand population. The tax levy in 1925 was \$13,489,881.68, giving a rate of \$28.62 per thousand.

One of the outstanding features of the city is its park system which includes five large and twenty-six small parks containing 1,649 acres. Genesee Valley Park contains 589.83 acres; Durand-Eastman Park along the Lake Ontario Shore contains 474 acres; Edgerton (Exposition) Park has an area of 42 acres, contains eight large practical and beautiful buildings.

Because of the high grade of workmanship demanded in most of Rochester's industrial organizations, Rochester boasts an unusually large percentage of skilled mechanics. This means that wages are good, a situation which is reflected in the large proportion of home-owners found in this city. More than 42% of Rochester's dwelling are owned by those who live in them, which puts Rochester among the first ten cities of the country in this respect

From a transportation point of view the city enjoys many advantages. Many of the articles manufactured in Rochester are of a specialty and technical nature. The out-bound freight business from Rochester, therefore, is largely made up of less than carload shipments. As a result of this immense tonnage, the city undoubtedly has the best distributive service of any city this side of the sea board. Rochester is served by five steam roads and as many interurban trolleys. It is also located on the New York State Barge Canal and has an excellent harbor at the mouth of the Genesee where a great tonnage of in-bound and out-bound freight is handled, as well as a great volume of passenger traffic.

The city has recently established a Municipal Dock in the harbor and is taking other steps for the development of this natural resource. With the exception of the firms located on one single track line, all industries of Rochester are located in what is known as the Rochester switching district. Cars in-bound by any route, with the one exception named, can be spotted on the sidings of industries within the switching territory free of any additional expense. In other words, cars are spotted in the industries or forwarded therefrom on the basis of no greater cost than the flat Rochester rate. In the harvesting season hundreds of carloads of peaches, pears, grapes, apples and other fruits are shipped out of Rochester and surrounding territory.

Rochester is but an over-night's ride from New York, Washington, St. Louis, Cincinnati, Cleveland, Detroit, Toronto, Boston, Montreal and Chicago. This gives fast service in obtaining coal and other raw materials and in the distribution of finished products. One of the latest improvements in the city's transportation facilities is the new belt line railroad through the heart of the city in the bed of the old Erie Canal. This connects up all the railroads serving Rochester, both steam and electric, and provides rapid transit service for residents of the city as well as a fast freight movement.

The Barge Canal harbor, three miles long, extending from the heart of the city to the crossing of the Barge Canal on the South, has just been completed, together with extensive terminal facilities.

National advertising of many of the large industrial organizations has helped to keep Rochester and its products before the world. Goods from Rochester factories are found on the counters of merchants in all the states of the union and in many foreign countries.

About 40,000 horse power of electricity is developed from the Genesee River and plans have been made for the development of many times this amount by the damming of the Genesee at Portage.

Rochester enjoys excellent educational opportunities, especially of a technical and artistic nature, including schools of music, of art, and of medicine. The latter is just being organized along plans which will make it one of the leading institutions of its kind in the country, under the administration of the University of Rochester.
